“Horse Fetish”

This Horse Fetish sculpture is similar in shape and form to ancient stone and clay fetishes that have been unearthed throughout the ages. There was no need to capture realism in the making of these pieces but instead to capture the magic that the animal possessed. When the horse was introduced to man it changed his life forever. Man became one with the horse and could fly through the air, journeying to new places and awakening to new freedom and strength. This is the horsepower of the Horse Fetish.
